Online Harms according to the World Economic Forum

- Build groups: How would you define the term “Online Harms”? Which online phenomena would fall under your definition? Make a short list

Online Harms according to the World Economic Forum

- **Definition**

- **Threats to personal and community safety**, harms to health and well-being, hate and discrimination, violation of dignity, invasion of privacy, deception and manipulation (World Economic Forum, 2023)
- E. g., grooming, pro-terror material, extremism recruitment, radicalisation, violence, dangerous behaviours, technology-facilitated abuse, gender-based violence

Online Harms according to the World Economic Forum

- **Definition**

- Threats to personal and community safety, **harms to health and well-being**, hate and discrimination, violation of dignity, invasion of privacy, deception and manipulation (World Economic Forum, 2023)
- E. g., suicide, self-injury, eating disorders, developmentally inappropriate content

Online Harms according to the World Economic Forum

- **Definition**

- Threats to personal and community safety, harms to health and well-being, **hate and discrimination**, violation of dignity, invasion of privacy, deception and manipulation (World Economic Forum, 2023)
- E. g., hate speech, algorithmic discrimination
- Hate speech: Using derogatory or discriminatory language when referencing to an individual or a group of people, especially attacking their protected identity characteristics, including but not limited to gender, religion, and ethnicity

Online Harms according to the World Economic Forum

- **Definition**

- Threats to personal and community safety, harms to health and well-being, hate and discrimination, **violation of dignity**, invasion of privacy, deception and manipulation (World Economic Forum, 2023)
- E. g., online bullying, harassment, sexual extortion

Online Harms according to the World Economic Forum

- **Definition**

- Threats to personal and community safety, harms to health and well-being, hate and discrimination, violation of dignity, **invasion of privacy**, deception and manipulation (World Economic Forum, 2023)
- E. g., doxxing, Image-based abuse
- Doxxing: Exposing sensitive identity details online without the victim's consent with the intention of placing the target at risk, intimidating, and doing harm

Online Harms according to the World Economic Forum

- **Definition**

- Threats to personal and community safety, harms to health and well-being, hate and discrimination, violation of dignity, invasion of privacy, **deception and manipulation** (World Economic Forum, 2023)
- E. g., Disinformation, misinformation, “deceptive synthetic media”, scams, impersonation, phishing, catfishing
- Deepfakes: Content, esp. videos, generated to appear real with the help of artificial intelligence and analysis of large amounts of data (Armitage & Vaccari, 2021)

Information Disorders

- In your group: What is the difference between misinformation and disinformation. Is this distinction important and if yes, why, if no, why not?

Information Disorders

- **Definition**

- A concept describing illegitimate and harmful types of information, including **mis-**, **mal-**, and **disinformation**

Source: Wardle, 2020

Information Disorders

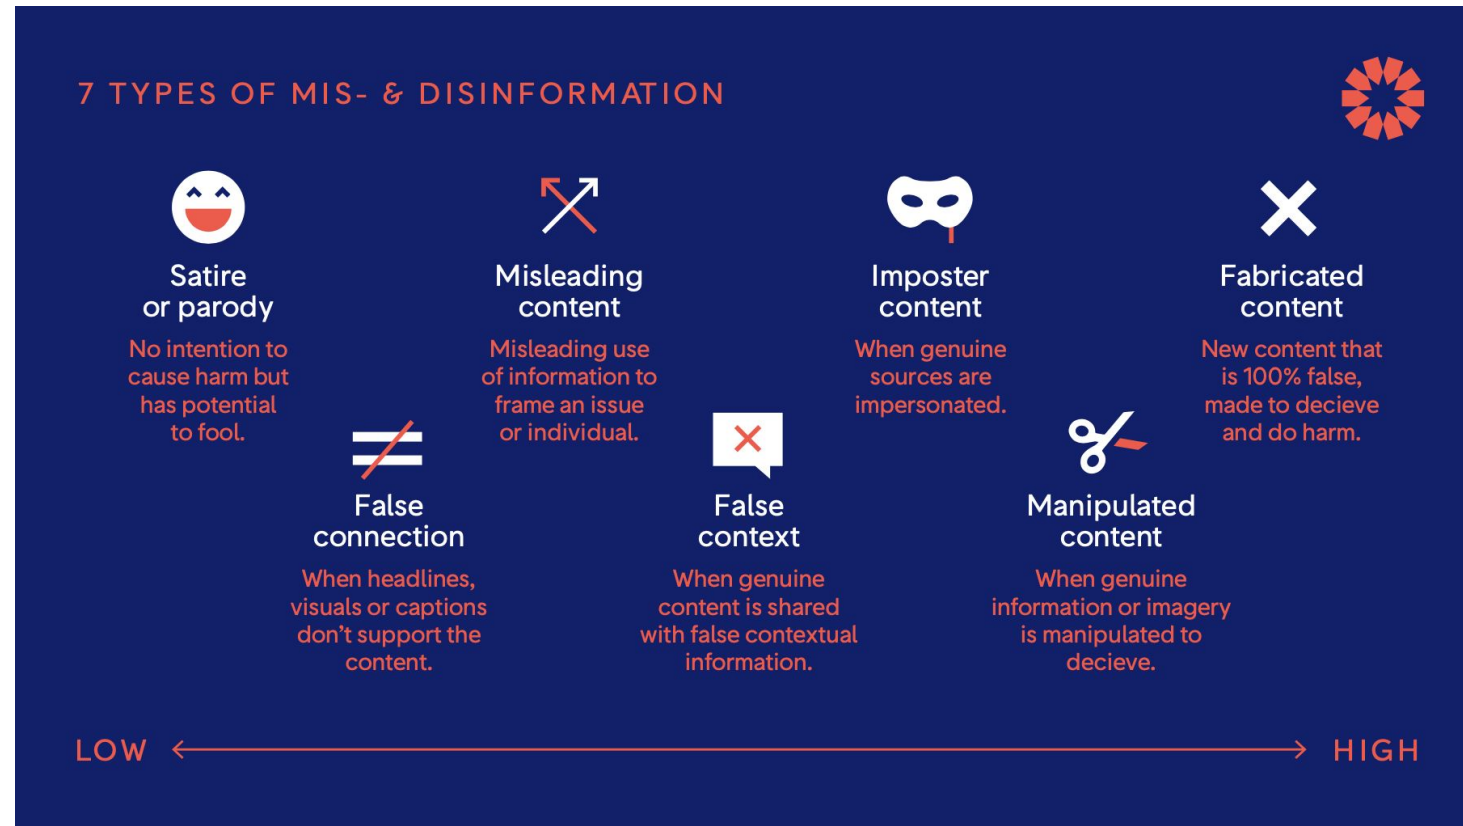

- **Definition**

- Visualisation based on an outline of Keller et al., 2020. Dimensions: (1) Relationship towards truth and (2) intent

	True	Untrue
No intent to deceive	Information	<i>Misinformation</i>
Intent to deceive	<i>Malinformation</i>	<i>Disinformation</i>

Source: Own illustration based on Keller et al., 2020

Types of mis- and disinformation

Source: Wardle, 2020

The spectrum of manipulation

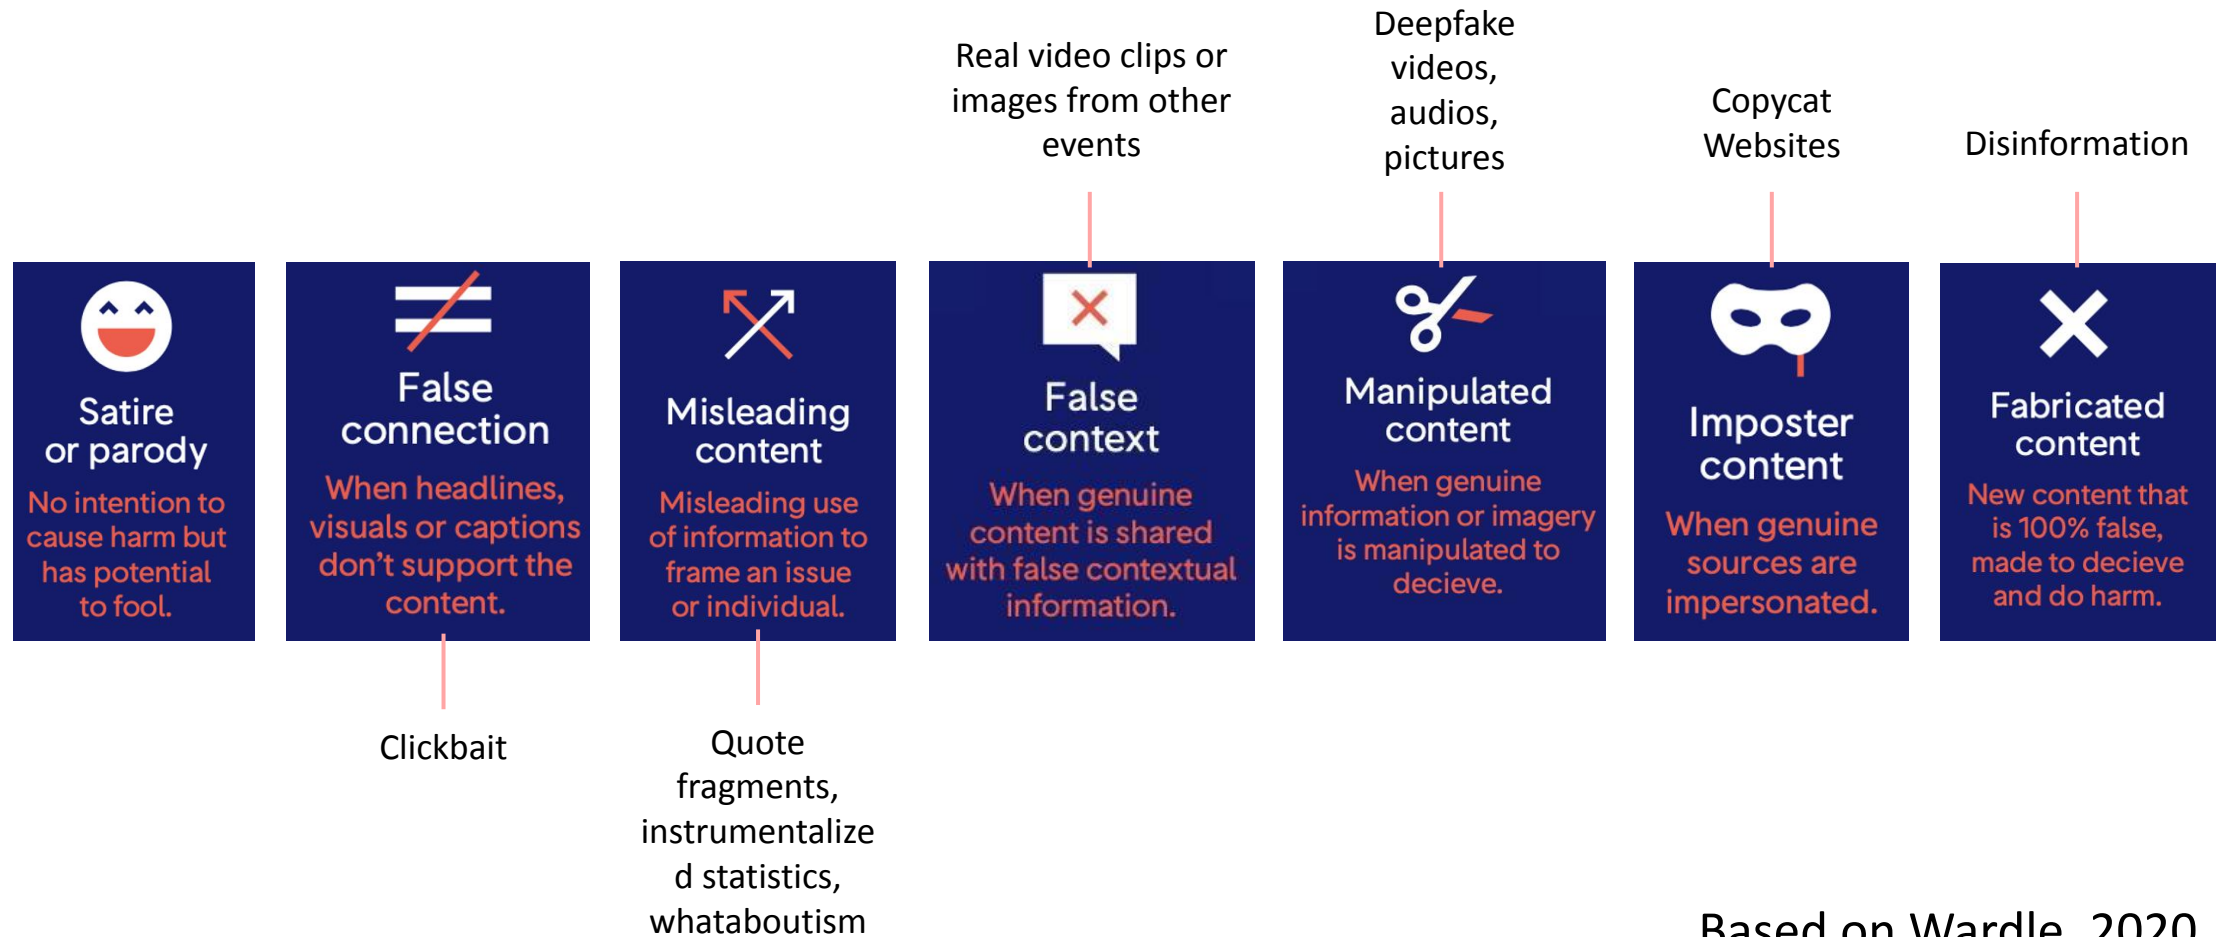

- **Beyond disinformation...**

- False news, false flag operations, inaccurate quotes, manipulated information, biased or misleading information, false amplification (Weedon et al., 2017)

Based on Wardle, 2020

Informationsmanipulation umfasst Form und Inhalt

Based on Wardle, 2020

Disinformation

- **Goals**

- Three motivations: make **money**; have **political influence**, cause **trouble** (for the sake of it) (Wardle, 2020)

- **On the diversity of disinformation motives**

- In your group: Outline a plan for your own disinfo intervention to accomplish one of the goals above (to make money, gain political influence, cause trouble and chaos) and think of real-world examples of disinformation incidents for each objective

Disinformation

- **Example 1: Make money**

- “More than 800,000 people in Europe and the US appear to have been duped into sharing card details [...] with a vast network of fake online designer shops apparently operated from China.”

Source: [Theguardian.com](https://www.theguardian.com) (link)

Disinformation

- **Example 2: Political influence**

- *Vote Leave* campaign bus in May 2016 used by the Johnson administration ahead of Brexit referendum

Source: [Bloomberg.com](https://www.bloomberg.com) (link)

Disinformation

- **Example 3: Cause trouble**

- Fake accounts: Twitter confirmed that the *Twitter* account @TEN_GOP was a fake, run by a Russian operative connected to a troll factory in St. Petersburg.

Tweet:

Tennessee @TEN_GOP

Aug 23

BREAKING: Antifa creating chaos in Phoenix. Gas is being deployed outside the convention center.

Disinformation

- **Note:**

- Truly manufactured information and fabricated content is rather rare (Butler et al., 2024)
- It is but one among many and more subtle attempts to manipulate public discourse (e. g., decontextualised content, partial content, doctored content, framing)

Malinformation

- **Definition**

- Strategic spread of true facts but with a negative intent (Keller et al., 2020)
- In your group: Which actions would fall under this definition? Do you know any real-world examples?

Malinformation

- **Definition**

- Strategic spread of true facts but with a negative intent (Keller et al., 2020)

- **Examples**

- The leaking of emails of John Podesta, chairman of Hillary Clinton's 2016 presidential campaign
 - Cyberattack attributed to a Russian military intelligence agency. Whether the emails were doctored remains unclear. In case of doctoring, it would be disinformation

Malinformation

- **Malinformation**

- Strategic spread of true facts but with a negative intent (Keller et al., 2020)

- **Malinformation as a viewpoint dependent behaviour**

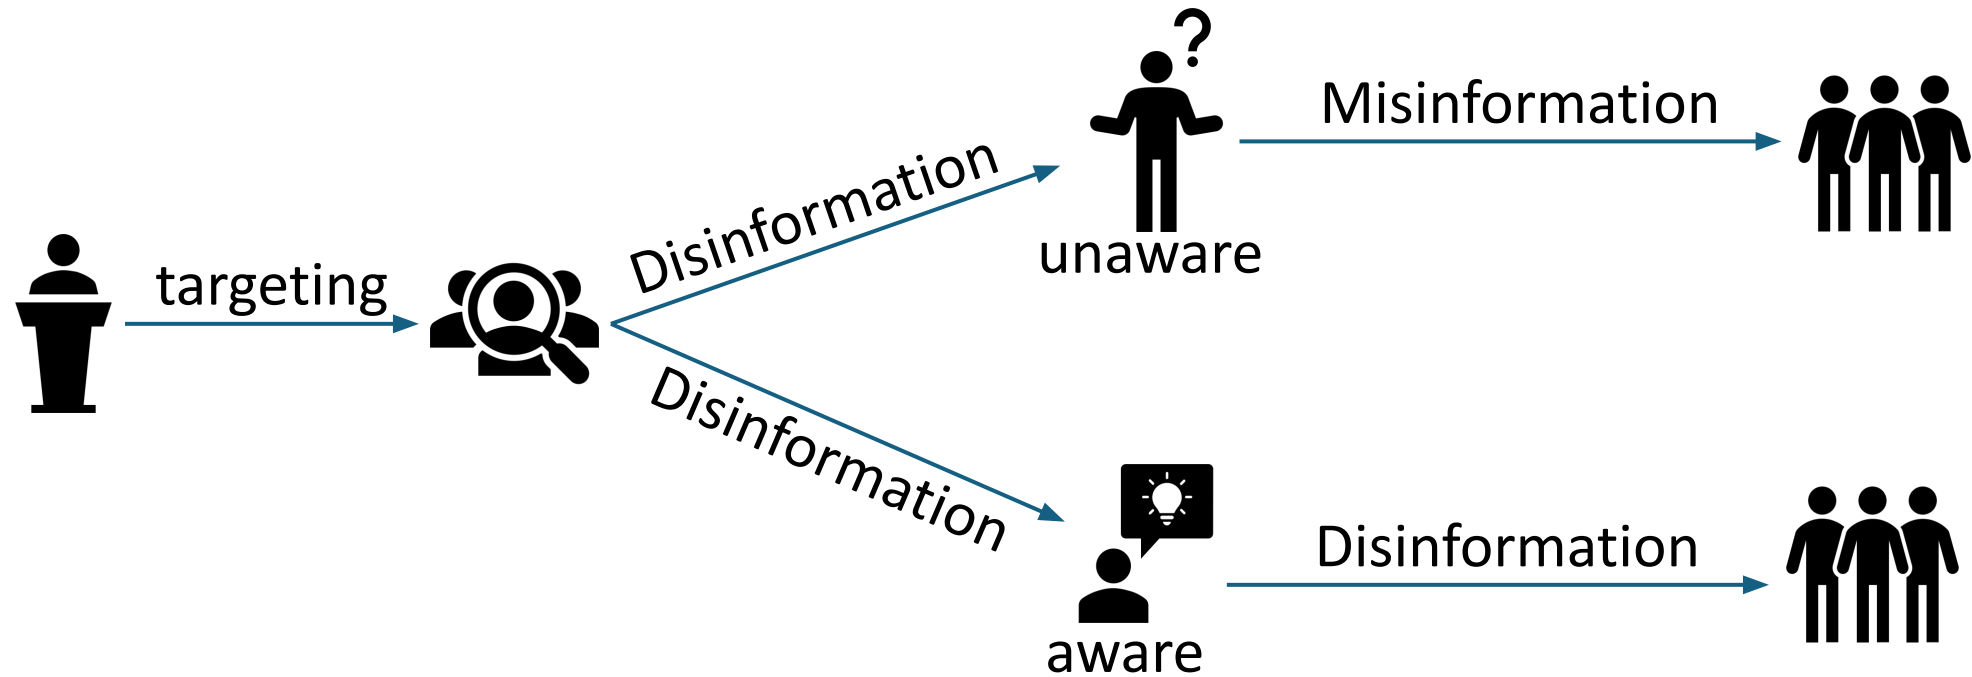

- *WikiLeaks* also obtained the leaked material and published over 20.000 pages of emails (Carroll, 2016).
 - In your group: Would you consider the behaviour of *WikiLeaks* ethically legitimate or an act of malinformation? Note down possible arguments for both positions

Misinformation

- **Definition**

- False information spread without intention to harm (Keller et al., 2020)

Source: Own illustration

Fake News

- In your group: How would you define the term “Fake News” and how would an incident of Fake News look like?
- Although it is still being used in academic literature, there is an open discussion on whether to better drop the term. Can give an explanation why?

Fake News

• Definition

- Still being used in academia, for example to describe forms of disinformation that is purposefully given a news-like appearance (George et al., 2021)
- Term was co-opted and appropriated by Donald Trump (Coll, 2017) and other to denounce mostly moderate to left-leaning and public broadcasting media
- In your group: Would you advocate to continue using the term “Fake News” in academia, or would you abandon it?

What is information manipulation?

- Definition
 - **Information Manipulation:** appealing to irrational impulses and using other communicative tactics to influence the beliefs and actions of target audiences (Klemp, 2010)
 - Share of truly **manufactured information** rather rare (Butler et al., 2024)
